1. Which are the two common types of supervised learning? (Choose two) 1 / 1 point

☐ Clustering

☒ Classification

 **Correct**

Classification predicts from among a limited set of categories (also called classes). These could be a limited set of numbers or labels such as "cat" or "dog".

☒ Regression

 **Correct**

Regression predicts a number among potentially infinitely possible numbers.

2. Which of these is a type of unsupervised learning? 1 / 1 point

☐ Classification

☒ Clustering

☐ Regression

 **Correct**

Clustering groups data into groups or clusters based on how similar each item (such as a hospital patient or shopping customer) are to each other.
